

#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

Clinical Case Discussion 23			
	Closed (Fig. 1.45)	Open	Strain (indirect)
<b>Features</b>	The capsule and supporting ligament and joint capsule are continuous with the surrounding tissues. There is no communication between the joint and the external space.	The joint capsule is thick and strong. The joint capsule is not attached to the surrounding tissues. There is a communication between the joint and the external space.	The joint capsule is thin and weak. The joint capsule is not attached to the surrounding tissues. There is a communication between the joint and the external space.
<b>Major clinical features</b>	Negative tests for atmospheric pressure (fluid, air, or gas) within the joint capsule.	Major clinical feature is intra-articular fluid. Intra-articular fluid is present. Usually, the typical communication, communication is likely to be the result of a fracture or a traumatic event.	Major clinical feature is positive tests for atmospheric pressure (fluid, air, or gas) within the joint capsule. It is an abnormal condition. It is likely to be the result of a fracture or a traumatic event.
<b>Causes</b>	<ul style="list-style-type: none"> <li>Fracture of the distal humerus or proximal humerus</li> <li>COPD</li> <li>Dislocation due to congenital laxity</li> <li>Fracture of the proximal humerus</li> <li>Separation of the acromioclavicular joint</li> </ul>	<ul style="list-style-type: none"> <li>Trauma (usually)</li> <li>Lung disease</li> <li>Arthritis (usually)</li> <li>Dislocation</li> <li>Lung disease</li> </ul>	<ul style="list-style-type: none"> <li>It is a rare cause of the disease.</li> <li>Causes of the disease are:</li> </ul>
<b>Signs and symptoms</b>	<ul style="list-style-type: none"> <li>Major clinical feature is intra-articular fluid. Intra-articular fluid is present.</li> <li>Some patients may present with communication with the external space.</li> <li>Fluid of the joint may be visible on the surface.</li> </ul>	<ul style="list-style-type: none"> <li>Major clinical feature is intra-articular fluid.
